

2005 - 2010 Grant Cycle

For the 2005-2010 grant cycle, we will focus our resources on the areas of education and land conservation.

Areas of interest are:

- Capital improvements which create better learning facilities
- Innovative academic programs which target specific populations
- The application of new technology in education
- Vocational training programs
- Before/after school programs
- Assisting Land Trusts to acquire land and conservation easements
- Nature preserves and community gardens

MISSION STATEMENT

The Adams Legacy Foundation was established in 2005 to foster a commitment to philanthropy in the founder's heirs and succeeding generations. We are a family foundation which seeks to leverage its investments for the future. We restrict our activities to funding facilities, projects and endowments, not ongoing operational expenses. We support both secular and faith-based projects and programs which embody the values of our founders.
